ABOUT ME

I've transformed my life from a Geologist to a "Developer" and can do the same for you. I build value through code and am ready to accept a challenge.

I have a deep passion for software development, algorithms and problem solving. Through a year of practice and many personal projects, I honed my knowledge and skills as a programmer, developing a certain versatility in using technologies and coding languages. As I am mostly a self-learner. I can easily adopt to new things and always ready to take on a challenge.

Moreover, I have a Strong interest in innovation and continuous improvement within technical applications, excellent incident management skills which involve performing in-depth analysis of issue resolution, ability to manage multiple tasks and willingness to travel to customer sites if required.

B I O D A T A
